Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/822,097.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

Applicant's election without traverse of Figs. 1A, 1B, 2 and 7 in the reply filed on April 17, 2006 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-9, 11, and 13-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al. ('327).

Chang et al. discloses a mechanism for coupling first and second structure comprising a first member (22), a second member (24), a contactor (38), means for generating a levitation force (Abstract, lines 5-12), a resilient member (38), means for bringing the first and second members into contact (Col. 3, lines 19-25), a surface/vibrating body (82), a vibrator/piezo electric device (54), an alternating signal, a stationary wave (53), a non-contact state, a driving source (10), and a control circuit (23, 25, 26, 28, 34). Concerning claims 13-8, the prior art discloses the steps of coupling the structures, pressing the members, generating a levitation force, providing the first member, controlling the supply of an AC signal, controlling the magnitude (Figs. 4a, 4b), and biasing the members together.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sudau ('672) and Lee et al. ('838) disclose other levitating couplings.
